

BRANDON MAY

Charlotte, NC | 704-248-1067 | brandon@brandonmay.dev | brandonmay.dev | github.com/brandonmay-dev | linkedin.com/in/brandonmaydev

FULL-STACK DEVELOPER

SUMMARY

Full-stack developer and Computer Science student building React, Next.js, TypeScript, Node.js, and Express applications with authentication, databases, real-time features, REST APIs, and third-party integrations. Experienced with production-style projects involving video calls, live coding workspaces, real-time chat, media workflows, AI integrations, and full-stack application architecture

SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Zustand, Shadcn UI, Radix UI

Backend: Node.js, Express.js, REST APIs, Socket.IO

Databases: MongoDB, PostgreSQL, Convex, Knex

Tools & Services: Git, GitHub, Clerk, Stream Video, Monaco Editor, Cloudinary, Clarifai, bcryptjs

EXPERIENCE

Independent Projects, Charlotte, NC | *Full-Stack Developer* | 01/2025 – Present

- Built and deployed full-stack applications using React, Next.js, TypeScript, Node.js, Express, MongoDB, PostgreSQL, Convex, Socket.IO, Clerk, Stream Video, Cloudinary, and third-party APIs.
- Designed application workflows with REST APIs, authentication, database persistence, real-time communication, video meetings, media handling, and environment-based deployment configuration.
- Built features include live coding workspaces, real-time chat, interview scheduling, recording playback, AI face detection, user dashboards, and admin review flow.
- Made architecture decisions around global state, API security, media storage, role-based access, frontend/backend separation, and third-party service integration.

Zero To Mastery, Remote | *Open-Source Web Developer* | 12/2025 – Present

- Contributed to open-source web projects through GitHub pull requests, issue tracking, bug fixes, documentation updates, and collaborative code review workflows.
- Improved frontend code quality by following project guidelines, applying maintainer feedback, and working in shared codebases

PROJECTS

DevCall | Full-Stack Remote Coding Interview Platform

GitHub: github.com/brandonmay-dev/devcall | Live Demo: devcall.brandonmay.dev

- Built a coding interview platform with scheduling, real-time video calls, live coding, feedback, and recording playback.
- Integrated Clerk, Convex, Stream Video, and Monaco Editor to support authenticated real-time interview workflows.
- Implemented role-based candidate/interviewer flows for meeting setup, comments, ratings, pass/fail review, and recordings.

Sync | Full-Stack Music Streaming and Real-Time Chat App

GitHub: github.com/brandonmay-dev/sync | Live Demo: sync.brandonmay.dev

- Built a music streaming app with persistent playback, real-time chat, online presence, media uploads, and admin tools.
- Used Zustand for global audio state so playback continues across routes without resetting.
- Implemented Socket.IO chat, authentication, MongoDB data persistence, and Cloudinary uploads

Smart Brain | Full-Stack AI Face Detection App

GitHub: github.com/brandonmay-dev/smart-brain | Backend: github.com/brandonmay-dev/smart-brain-api |

Live Demo: smartbrain.brandonmay.dev

- Built an AI face detection app with authentication, image submission, user profiles, and visual face-box rendering.
- Converted Clarifai coordinates into browser pixel values to render accurate bounding boxes.
- Built Express/PostgreSQL APIs for authentication, profiles, entry tracking, and secure server-side AI requests.

EDUCATION

Western Governors University, Remote

Bachelor of Science in Computer Science | Expected August 2027

The Art Institute of Atlanta, Atlanta, GA

Associate of Arts in Audio Production | 2009
